Linking to EBSCOhost Articles

1. Once you locate an article in one of EBSCO’s databases, click the title of the article.

2. When the record opens, note the Tools options on the right side of the screen. Click Permalink.

3. Copy the Permalink that appears directly above the title of the article.

4. There are 2 methods for adding the link to your Blackboard course content.
   a. Go to Blackboard. Access your course. Under Build Content, select Web Link and paste the Document URL. Under options, be sure to check Open in New Window.
   b. A link can also be added into text by selecting Create Item. In the text box, use the hyperlink feature to link to the article. Remember to select Open in New Window.

If you have questions, contact Teresa Grimm, at grimmtm@lakeland.edu, or call 920 51038, ext. 2418.
